

Build your complete label.

Start with the right size. Add current product information. Send the complete file to OSM before you print.

VERIFIED TRIM SIZES

Focus, Energy and Hydration powders

8.875 x 2.25 in

Moisturizer / Skin Hydration Cream

6.5 x 1.15 in

01 Open the matching SVG blank.

Keep its physical size. Powder trim uses 0.125 in rounded corners. Ask OSM for the correct template for any other cream or container.

02 Get the current product information.

Ask OSM for the approved facts or ingredient panel, net contents, directions and warnings for your exact product. Never reuse another product's panel or invent facts with AI.

03 Complete your own compliance review.

Check your brand name, claims, business details, required contact details and all label text. Our diagrams are examples of layout, not a complete compliance checklist.

04 Submit your complete file.

Upload a PDF, PNG or JPEG up to 8 MB at osm.gg/submit-label. Keep your editable source file. OSM will reply after a courtesy review. A submission does not approve production.

05 Confirm printing before placing an order.

Confirm bleed, safe area, color settings, stock, final dimensions and jar fit with OSM. Remove starter notes and guides from the final export. Do not print or ship labels until OSM confirms the proof and instructions.

Customer responsibility: you are responsible for your label, claims and legal requirements. OSM's courtesy review is not legal advice or regulatory certification and does not remove any legal duty that applies to OSM.

Give every panel a job.

Illustrations only. Panel widths and text sizes below are not production measurements.

DIETARY SUPPLEMENT EXAMPLE

FRONT PANEL

Your brand + product identity
Dietary supplement designation
Net quantity in the required area

INFORMATION PANEL

Current Supplement Facts panel
Other ingredients + required warnings
Business name/address and contact
Directions as appropriate

Keep required information together as the applicable rules require. Art must not crowd or cover it. Use the exact current formula and serving information. Placement, type size and claim rules depend on the product and package.

COSMETIC CREAM EXAMPLE

FRONT PANEL

Your brand + product identity
Net quantity

INFORMATION PANEL

Current ingredient declaration
Business details + required contact
Directions and warnings as needed

Creams do not use Supplement Facts just because they contain a supplement ingredient. Confirm the product classification and claims first. Drug claims can bring different requirements. Cosmetic rules may require adverse-event contact information.
